Summary

Full Stack Developer in Amsterdam specializing in JavaScript, React, Ruby on Rails, and responsive web design. Built production-ready applications with focus on intuitive UI/UX and clean code architecture. Strong background in client communication and Agile development, delivering practical solutions that balance technical excellence with user needs. Proven ability to manage full development lifecycle from concept to deployment. No sponsorship required, holding a valid Dutch work permit for the next 5 years.

TECHNICAL SKILLS

Backend: Python · Ruby · Ruby on Rails · RESTful API · CRUD Operations · OOP · MVC Architecture · JSON

Database: SQL · PostgreSQL · Database Design

DevOps & Tools: Git · GitHub · Docker · Heroku · Copilot · Claude Code · OpenAI API · Version Control · CI/CD · Agile/Scrum · JIRA · Confluence · AWS

Design & Collaboration: Figma · UI/UX Design · Wireframing

Full Stack Projects

DealHuntr

github.com/ozgekuzhan/dealhuntr | 2-week team project

Product deal aggregation platform connecting users with discounts from multiple retailers

- Created responsive frontend using JavaScript (Hotwire) and Bootstrap 5 with mobile-first design.
- Built a Rails backend with RESTful routing for product deal management across stores.
- Designed a PostgreSQL database with a normalized schema and optimized indexing.
- Implemented a smart recommendation system using keyword matching and category filtering.
- Technologies: Ruby on Rails, PostgreSQL, Bootstrap, JavaScript, Docker.

WorkTree

github.com/ozgekuzhan/worktree | 5-day sprint project

Office and coworking space reservation platform with role-based booking management

- Designed a dynamic, SPA-like frontend using JavaScript (Hotwire) and Bootstrap 5 for seamless navigation.
- Built a Rails backend with RESTful routing and role-based authentication using Devise (owner/renter roles).
- Created a three-state booking approval workflow with owner controls (pending, accepted, declined).
- Integrated an image upload system using Active Storage and Cloudinary for space photos.
- Technologies: Ruby on Rails, JavaScript, PostgreSQL, Devise, Docker, and Bootstrap.

Experience

Full Stack Web Developer

Remote

Freelance & Portfolio Development

07/2023 - Present

- Completed Le Wagon Amsterdam intensive bootcamp (400+ hours) building two production applications.
- Developed over 10 web applications using JavaScript, React, Ruby on Rails, and PostgreSQL.
- Engaged in self-directed learning: over 500 hours of coding through Udemy bootcamps and hands-on projects.
- Built full-stack proficiency from frontend (React, Bootstrap) to backend (Rails, PostgreSQL).
- Technologies used include JavaScript, React, Ruby on Rails, PostgreSQL, Docker, Git, and Bootstrap.

Experience

Wiineed Software
Istanbul, Turkey
